## About Us

ISRAR ENGINEERING WORKS is a leading Manufacturer of Brick Making Machine. Earlier Labours were engaged in making of Brick. the labour cost is increasing day by day. Which has reduced profit margin to a great extent the technology use by ISRAR ENGINEERING WORKS Company has to a great extent Reduced the labour problem. making of bricks are automatically made by the machine manufacture by ISRAR ENGINEERING WORKS. The machine manufactured by ISRAR ENGINEERING WORKS is of world class standard under the guidance of its proprietor heavy vast experience of 8 years in this field we do best for the quality delivered by us. We have manufactured versatile machines according to the need of the customer. Our motto is to satisfy all our customers with the product and offer after sale service to the entire satisfaction of our customers. Soon we plan to export our product which is internationally competitive. The Brick making prepared by labour is no match to the brick making carried out by machine.

### VISION

To become the no. 1 company in the industry which delivers quality products to its customers believes in innovation to meet the changing needs of the customers and market also to keep their employee and stakeholders happy and satisfied. thus ensuring their growth along with the company.

### MISSION

To serve our customers as their most trusted and reliable partner in the field industry.introducing latest technology time by time in brick field so customers as can minimize their production cost and maximize their profits with the finest quality of production without affecting the nature.

### VALUES

#### PASSION

To Give Our Maximum & Be the best.

#### INTEGRITY

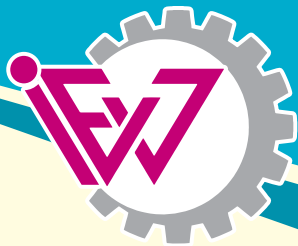

To Know What Is Right And Act Responsibly With Our Clients. Colleagues And Community

#### INNOVATION

To Keep On Improving Our Products and Services While Anticipating Our Clients Needs

## BMM 180

BODY STRUCTURE  
**MS & SS**

Production Capacity  
**6000-7000 Brick/Hour**

OPERATION SYSTEM  
**By Tractor**

Tractor Capacity  
**Power - 60 HP**

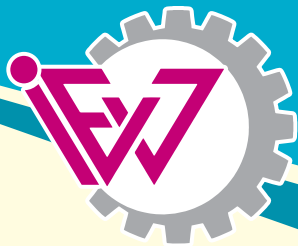

Fuel Consumption  
**5 Lit. / Hr.**

Apart from clay / soil used for raw material 30% flyash can be added (depending upon soil condition) which shall be cost efficient.

**3 Day Production**

Area Required Length 700 Ft. x Width 500 Ft.

## BMM 450

BODY STRUCTURE  
**MS & SS**

Production Capacity  
**12000-13000 Brick/hr.**  
(Under Condition)

Whole Operation  
Completed by  
**3-4 Workers**

OPERATION SYSTEM  
**By Tractor**

Chasis

**IEW Made**

Tractor Capacity  
**90+ / hp**

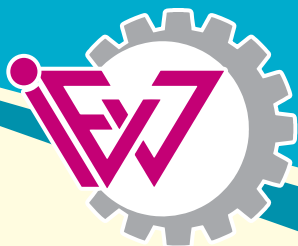

Fuel Consumption  
**10 Lit/Hour**

Apart from clay / soil used for raw material 30% flyash can be added (depending upon soil condition) which shall be cost efficient.

Length 850 Ft. Area Required for 3-4 Day Production

## BMM 250

### BODY STRUCTURE

MS & SS

### Production Capacity

250-280 Brick/Min.

### Fuel Consumption

6 Lit./Hour

### OPERATION SYSTEM

By Tractor

### Chasis

IEW Made

### Whole Operation Completed by

3-4 Workers

### Tractor Capacity

70 H/p

## Easy to Operate

Length - 650 Ft., Width - 500 Ft. - Area  
Required for 4 Day Production

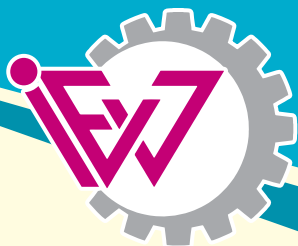

## SOIL CLEANING MACHINE

### Production Capacity

25,000 / Hr.

## BMM 350

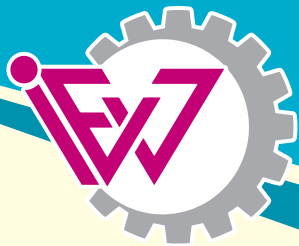

Body Structure	MS & SS
Production Capacity	12000 / Hr. (Under Condition)
Operation Mode	By Tractor
Tractor Capacity	90 H/p
Fuel Consumption	7 Lit / hr.
Chasis	IEW Made
Whole Operation Completed By	3-4 Workers

Apart from clay / soil used for raw material 30% fly ash can be added (depending upon soil condition) which shall be cost efficient.

Length - 850 Ft. Area, Required for 3-4 Day Production
